EDUCATION

B.TECH(MECHANICAL ENGINEERING)	2023-2027	NSUT, New Delhi	6.49
CBSE(Class XII)	2022	Sarvodaya Bal Vidyalaya, New Delhi	84%
CBSE(Class XII)	2020	Sarvodaya Bal Vidyalaya, New Delhi	82%

PROJECTS

- CAD Project Hosted online here :---link---
- Designed multiple **Mechanical Components** using **Fusion 360** with parametric modelling and manufacturability considerations.
- Performed **structural (strength), thermal, and CFD analyses** of mechanical components using **ANSYS**.
- Executed geometry cleanup, meshing, boundary condition setup, and post-processing to evaluate stress, deformation, temperature, and flow behaviour.

ACADEMICS AND SKILLS

- Completed core Mechanical Engineering subjects including Manufacturing Processes, Theory of Machines, Control Systems, and Engineering Mechanics with a consistent academic record.
- Successfully completed a **CAE training program** covering **Fusion 360** and **ANSYS**, gaining hands-on exposure to CAD modelling, FEM, and basic CFD concepts.
- Actively strengthening practical engineering skills through tool-based learning alongside academics.

TECHNICAL SKILLS

- **CAD :** Fusion 360, SpaceClaim , NX(learning).
- **CAE :** Ansys Workbench (Fluent, CFX, Rigid dynamics, ...)
- **Core Analysis :** Structural, Thermal, Fluid flow, Topologies and optimization

CERTIFICATION

- **CAE Certification :** CAE Industrial Training program by NSUT during **09th June – 18th July 2025**

Learnt a lot about industry grade work in the field of FEA, Drafting, CAD and much more , as many industrial peoples did seminars and took lecture , they were from different companies such as Autodesk , curiosity 3D, ARK infosolution etc
